

## **7** stages that deliver depot charging for your fleet

# **Shell Fleet Solutions** offers end-to-end depot charging solutions for fleets

As a fleet owner or manager, you likely already know you need to make the transition to electric vehicles (EVs). But you might also be wondering what you need to do to get started.

Which vehicles in your fleet should you transition? How can you keep them charged and ready to go when needed? What does it all mean for performance and efficiency? How can you keep your costs down?

At Shell Fleet Solutions, we're more than a solutions provider. We're a partner who can help you answer those questions and support you at every step of your electrification journey.

**SHELL FLEET SOLUTIONS** 

TOGETHER ANYTHING IS POSSIBLE

### Initial Engagement We work with your business to frame your overall ambition and decarbonisation strategy, while assessing your demand, fleet size and location

2

#### **Requirement Gathering**

We collaborate to collect your business and technical requirements (e.g. energy capacity), then jointly establish a timeline and roadmap

#### **Solution Design**

Shell experts visit your site to gain insights and to design the optimal charging and energy infrastructure for your business

#### Charge Management

We give you access to an online platform to manage 6 your charging infrastructure

#### Infrastructure Installation

5

4

We efficiently install your charge points in line with high safety and security standards

#### Solution Validation

We share both technical and commercial proposals - including advice on subsidies - and work towards a final agreement

#### Support & Maintenance

We have dedicated teams available to keep your equipment running and deal with day-to-day enquiries
